# VALVES THREADED BUTTERFLY PNEUMATIC PACKAGE

MODEL: 1313-TBV-CPAP

Revision: 0

#### **DESCRIPTION**

The TBV-CPAP pneumatic operated butterfly valves are used for modulating air and gas flows for most types of combustion systems. A unique "O"-Ring seal prevents leakage around the shaft. Available from 1" to 6" pipe sizes.

The valve crank rotates through an 80° arc. Disc position is indicated by a slot on the disc shaft relative to the nameplate scale. The mounting bracket is pre-drilled for a Pyronics PA-6 pneumatic actuator (see Bulletin 1701).

The TBV-CPAP includes the butterfly valve, actuator mounting bracket, valve crank arm, and an adjustable linkage.
