Customized to the application*

Custom Pipe Burners

Custom pipe burners designed for specific applications available in a variety of shapes and sizes for deflashing and surface modifications.

How It Works

Selas recognizes that there are often very specific and unique combustion needs depending on the application. We offer custom pipe burners designed specifically

to provide our customers with innovative solutions. Contact a Selas Application Specialist today for your custom pipe burner design.

Applications:

- Tank heating
- Flame treating
- Deflashing
- Surface modifications

Diverse Combustion Technologies. One Reliable Source.

Operating Principles

Custom Pipe Burners are available in a variety of shapes and sizes:

- Circular
- Curved
- Oval
- Octagonal
- Square
- Rectangular
- And more

The design of the custom pipe burners is dependent on the application and needs of the operation and is very flexible. From 5 gallon plastic buckets and plastic bottles, to watering cans and cooler sleeves, we have a custom pipe burner solution for your operation.

Some typical applications include:

- Tank heating
- Flame treating
- Deflashing
- Surface modifications

Features

Available in a variety in shapes and sizes

Benefits

Customized thermal profile to a specific process
